Career Objective

Final-year B Tech Computer Science (Cyber Security) student with experience in NLP, AI, and cybersecurity projects. Seeking opportunities to apply technical skills in software development, cybersecurity, and emerging technologies while contributing to organizational growth.

Education

GARDEN CITY UNIVERSITY Bengaluru

Sep 2023 - June 2027

B Tech Computer Science (Cyber Security)

CGPA: 8.38/10

Relevant Coursework: Data Communication, Block Chain Technologies, Computer Networking and Troubleshooting, Advanced Machine learning (Intel AI), Data Analysis and Visualization, Cryptography and Network Security (CS), Cloud computing, Data warehousing and Data Mining, Big Data Analytics, Data Privacy and Data Security.

Skills

Languages: Python, Java, C, C++, Web Design

Cyber Security: Vulnerability Assessment, Network Security, Basic Penetration Testing

Technologies & Tools: Git, GitHub, Claude AI, Wireshark, Nmap, Kali Linux, Canva, WebStorm, VMware Workstation, VS code, MySQL, XAMPP

AI & Machine Learning: CNN, TensorFlow, Data Annotation, NLP Basics

Soft Skills: Communication, Teamwork, Problem – Solving, Event Coordination, Leadership, Time Management, Project Management

Areas of Interest

- Cyber Security
- Ethical Hacking
- Machine Learning
- Network Security
- Artificial Intelligence

Work Experience

Samsung SEED, Garden City University Incubation Foundation

Sep 2025 - Present

Junior Linguist

- Trained Bixby voice assistant models using data annotation and intent classification techniques.
- Evaluated speech and text data to improve natural language understanding and voice recognition accuracy.
- Recorded and analysed speech samples for pronunciation and acoustic model enhancement.
- Supported multilingual voice recognition improvements through data validation and quality assessment.
- Conducted quality checks to optimize voice assistant performance and user experience.

Project Work

- **AI-Based Handwriting Recognition System – Machine Learning Project**
Developed a handwriting recognition system using Convolutional Neural Networks (CNN) and the MNIST dataset. Trained and evaluated the model to recognize handwritten characters with high accuracy. Applied image preprocessing and machine learning techniques to improve prediction performance.
Technologies: Python, TensorFlow, CNN, MNIST
- **Voice Assistant Data Annotation & NLP Project**
Worked on Bixby voice assistant model optimization through data annotation, intent classification, and utterance evaluation. Analyzed speech samples to improve natural language understanding, voice recognition accuracy, and multilingual support.
- **Music Instruments E-Billing System – Java Swing Project**
Designed and developed a desktop-based billing system using Java Swing. Implemented customer details, product management, bill generation, and quantity calculation features. Focused on creating a user-friendly interface for efficient billing operations.
Technologies: Java Swing, Java
- **Cyber Security Vulnerability Assessment Project**
Performed security assessment on web applications to identify common vulnerabilities such as SQL Injection, Cross-Site Scripting (XSS), and weak authentication mechanisms. Documented findings and recommended security improvements.

Achievements

- Selected as Junior Linguist at Samsung SEED
- Participated in e-Yantra Competition
- Participated in technical workshops and hackathons
- Completed multiple Coursera certifications

Certifications & Training

Coursera Certifications:

- Modern Robotics, Course 2: Robot
- Deep Learning
- IBM Deep Learning with PyTorch, Keras and TensorFlow
- Flutter and Dart: Developing iOS, Android, and Mobile Apps
- Web3 and Blockchain Fundamentals
- Mobile App Development Capstone Project
- Apply Modern OpenGL for Real-Time Graphics Programming
- Interfacing with the Raspberry Pi

Languages Known

- English
- Kannada
- Telugu
- Hindi
- Tamil
- Spanish
